- 1<sup>st</sup> Position in AI/ML; Dev Arena; Ned University

## HOBBIES

- Coding
- Sports
- Reading
- Teaching

## PROFILE

I'm a passionate Software Engineering student at NED University, Pakistan, complemented by hands-on training in the Web & Mobile App Development Program at SMIT. My academic rigor in CS fundamentals blends with practical expertise in full-stack technologies like React.js, Node.js, and MongoDB. Driven by curiosity, I thrive on building real-world projects to bridge theory with industry-ready skills. My goal is to evolve as a versatile developer in this dynamic tech landscape.

## SKILLS

### Web Development

Proficient in crafting responsive, user-centric websites with modern frameworks like React.js, ensuring seamless performance across all devices. Proficient in HTML5, CSS3, and JavaScript (ES6+) to build dynamic interfaces with clean, maintainable code.

### UI Designing

Designing intuitive, visually compelling interfaces focused on usability and engagement. Leverage tools like Figma to create wireframes, prototypes, and pixel-perfect designs—always prioritizing user-centric principles and seamless interactions.

### Content Writing

Creating high-impact, SEO-optimized content that drives engagement and conversions. Combining storytelling with keyword strategy to boost visibility, while tailoring tone and messaging for target audiences across blogs, websites, and marketing collateral.

### Teamwork & Leadership

Proven ability to lead cross-functional teams and collaborate effectively in agile environments. Foster open communication, delegate tasks strategically, and drive projects to completion while motivating team members toward shared goals.

## EDUCATION

<b>Bachelor of Software Engineering</b> NED University of Engineering & Technology <b>CGPA:</b> 3.03/ 4.0	2023-2027
<b>Intermediate - Pre Engineering</b> Jinnah Govt. College <b>GRADE:</b> A+	2021-2023
